

# Downlights

Reliable LED downlights with the latest technology for foyers, lobbies, retail, and amenity areas

Prolume's range of LED recessed downlights can be used to replace a variety of fittings found in offices, hotels and other commercial environments.

Incorporating the latest chip-on-board (COB) LED technology from trusted brands Citizen and Epistar, Prolume downlights ensure consistent light distribution and reliability whilst innovative heat dissipation design results in low operating temperatures, ensuring a long trouble-free life.

Prolume downlights are available in 2.5in, 3.5in, 4in, 5in, 6in and 8in versions in various power levels and colour temperatures, and are appropriate for CFL replacement, dimmable and other downlighting applications.

## Key Features

### High lighting efficiency

- Delivers excellent glare control and uniform light
